

Step & Repeat Assembly Instructions

1. Step & Repeat frame carrying case.

2. Remove poles, feet and hardware from carrying case.

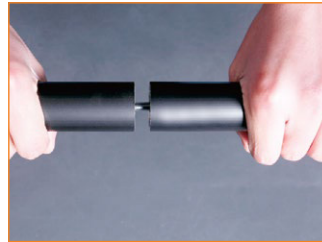

3. Locate the screws that are preinstalled into the bottom of the vertical poles. Remove the screws and insert the screws through the base of the foot.

4. Connect the foot to the vertical end pole. Turn the foot clockwise to fasten. Use finger to secure screw and hold steady.

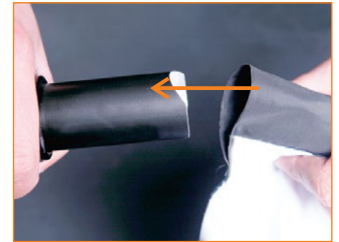

5. Repeat steps 3 - 4 with other foot and pole. Make sure both poles are tightly secured to the feet.

6. Connect the top and bottom (horizontal) poles.**

7. Adjust the top and bottom poles to extend frame to graphic width.

8. Insert the top and bottom (horizontal) poles into the pole pocket on the graphic. If your graphic has grommets instead of a pole pocket, please use the included zip ties to attach the graphic to the frame.

9. Attach the bottom horizontal pole to the vertical foot pole by using the included end knobs. Turn the knob clockwise to fasten.

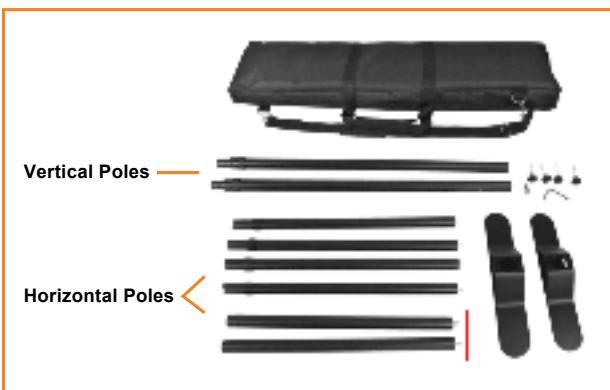

10. Repeat the previous process to attach the top horizontal pole to remaining vertical foot pole.

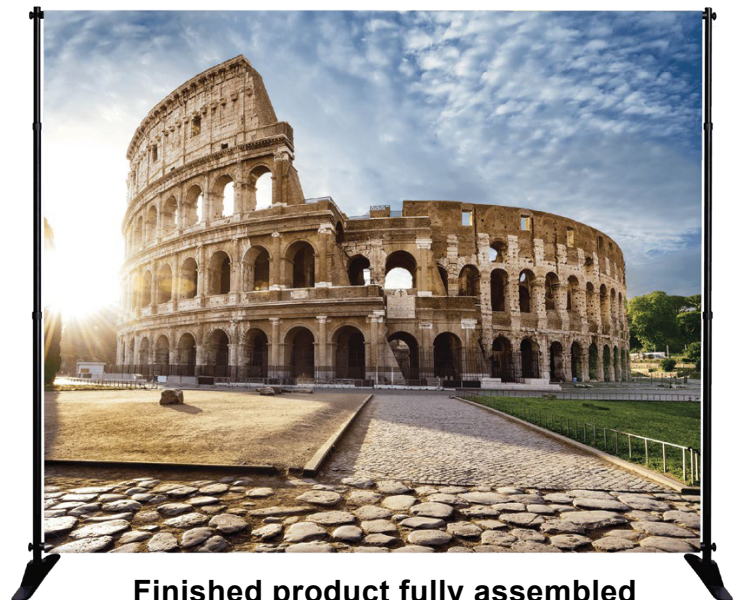

11. Adjust the poles, as needed, according to the height and width of the graphic.

12. Adjust/Straighten graphic on frame.

****Please note:** When using the frame with the 8' x 5' product, exclude the 2 poles outlined in red from assembly.

Finished product fully assembled
